Ubicación: Buenos Aires, Argentina
Phone: +54 9 11 6641 4910

Full Stack Developer with a background in Web Design. Experienced in working with technologies such as React, Redux, NodeJs, Express, PostgreSQL, Next.js, MongoDB, among others in the field. Currently, I am in a continuous learning process, working on personal projects to solidify what I've learned and expand my knowledge. I'm a sociable and proactive individual who works well in a team, embraces challenges, and excels at problem-solving. I acquired these skills during my previous work experience in the construction sector, where I performed physical tasks on-site. As a Site Manager, I successfully completed projects on time and within the budget, leading teams of architects, administrative staff, and subcontractors to execute all tasks.

PROJECTS

Oct-2023 E-Commerce - Jr. Full Stack Web Developer - *Personal Project*

Design and development of an e-commerce store where users can view products, add them to the cart, and make payments using Mercado Pago. The project includes an admin panel for adding and editing products.

Repository: [Client](#) / [Admin](#)

Deploy: [E-Commerce](#)

Jul-2023 Devter - Jr. Full Stack Web Developer - *Personal Project*

Design and development of a Twitter clone for developers. Utilized technologies like Next.js, React, Firebase Auth, Firestore Database, Realtime Database, HTML, CSS.

Repository: [Devter](#)

Deploy: [Devter](#)

Jun-2023 Consumedic - Trainee Full Stack Web Developer - *Henry Bootcamp - Group Final Project*

Design and development of a web application that allows users to book appointments with healthcare professionals, including third-party authentication, Mercado Pago, Cloudinary, admin panel, profiles for doctors and patients, email functionality, local storage, and logical deletion. I specifically worked on database modeling, relationships, and defining server request routes with their respective logic. I developed the calendar component for each doctor in both the backend and frontend. I was also responsible for developing the Doctor Panel where patient information, medical history, appointments, and the ability to send messages and upload files were displayed.
